To whom it may concern:

Mr. Larry Olsen started construction of our home, 3200 sq. ft. with 1200 sq. ft. finished walk out basement, on Oct. 30, 2000. During the winter we encountered a rather severe ice storm, while the home was still not under roof. Construction continued to go as planned without any meaningful delays. We moved into our home the first weekend in April of 2001.

My wife and I have been in the banking business 20 years each. Having been involved in all aspects of home construction and know about all the pitfalls both economic and personal. We were very relieved not to experience any of those problems with Mr. Olsen. Everything went just as he said it would, when he said it would and for the amount we agreed upon.

Both my wife and I are very happy with our home, and the job Mr. Olsen did for us. If we would decide to build again we would not have any hesitation to use Mr. Olsen again or recommend him to anyone for their construction needs.

Truly,

Bob & Pat Cruse
