October 18, 1999

**To Whom It May Concern:**

During the past eleven months I have had the pleasure of working with Mr. Larry Olsen. We selected Mr. Olsen to be the general contractor overseeing the construction of our new home in Kokopelli Estates. The home is a luxury home requiring a very high degree of detail; quality materials and workmanship, all of which met or surpassed our expectations.

My family and I relocated to Southern Illinois from Florida. It was difficult moving to a new area and taking on the task of building without knowing the area or the reputation of local general contractors. Mr. Olsen was very professional during all phases of construction, beginning with his proposal through the completion of our home. We began construction in mid December 1998 and the home was completed in June 1999.

We were fortunate enough to tour other homes Mr. Olsen had built prior to our contract with him. We were impressed with the quality, workmanship and attention to detail. The feedback we received from those individuals convinced us Mr. Olsen was the person we wanted overseeing the construction of our home.

During the construction process, he communicated with us regularly. He demonstrated excellent communication and project management skills. We found him to be honest and dependable.

My current position is Manager of Marketing and International Programs for one of the largest manufacturer's of ordnance and tactical system products in the United States. I am intimately involved in all facets of our business, ranging from marketing and sales to material procurement, quality assurance, production and product delivery.

My professional and personal experiences allow me to highly recommend Mr. Olsen as a general building contractor. I believe the management skills Mr. Olsen demonstrated to me during our home construction project are conducive to those skills required to successfully manage a large department within a business or government organization.

Sincerely,

Gary W. Fahrney
